

BridgeSupport

Bridging the Gap to Advanced Asset Management

**Elevate Your Bridge Assets with Proven
Expertise and Personalised Support**

LGA BridgeSupport

LGA Bridge Support Pty Ltd specializes in providing high-quality bridge engineering and asset management services tailored to meet the needs of Victorian local government authorities. Our commitment is to enhance the safety, performance, and longevity of bridge infrastructure within these communities, ensuring sustainable and cost-effective management of critical assets.

Chris Morton – Director

Chris is a Professional Engineer with Chartered Status in the areas of Structural Engineering and Asset Management, bringing over 20 years of experience in local government bridge engineering.

Josh Baulch – Director

Josh is a highly experienced and accredited Bridge Inspector (Victoria and NSW) and Project Manager, with over 8 years of experience delivering projects for a variety of asset owners and contractors.

Comprehensive Services

LGA BridgeSupport offers a range of specialist services:

Level 2 Condition Inspections: Detailed visual examinations of all accessible bridge components to assess their condition and document any defects for effective maintenance planning and prioritization.

Level 3 Engineering Investigations: In-depth engineering assessments combining field inspections and theoretical analyses to address specific structural issues and evaluate bridge condition and performance.

Asset Management Advisory: Strategic advice to optimize the lifecycle management of bridge portfolios, emphasizing cost-efficiency and risk mitigation.

Risk Management Consulting: Expert analysis to identify and mitigate potential risks associated with bridge assets, enhancing safety and operational continuity.

Asset Valuations: Accurate valuation services to support financial planning and ensure compliance with accounting standards.

Stakeholder Consultation: Engagement strategies to align infrastructure projects with community expectations and regulatory requirements.

Concept Design Services: Early-stage design solutions that integrate innovative engineering practices with practical, budget-conscious approaches.

Our Expertise

Experience: LGA BridgeSupport brings almost 30 years of experience in local government bridge engineering directly to your projects. At LGA BridgeSupport, clients receive personal, expert service at every step. LGA BridgeSupport understands local needs and offers practical solutions to multifaceted problems faced by bridge managers.

Services: From condition inspections to comprehensive asset management, LGA BridgeSupport offers a unique blend of hands-on experience and strategic foresight. The expertise encompasses Level 2 / Level 3 inspections, asset / risk management, stakeholder consultation, and the thoughtful evaluation of maintenance, rehabilitation, and upgrade options.

Mission: LGA BridgeSupport's mission is straightforward: to enhance the way councils manage their bridge assets. The aim is to provide strategic, fiscally responsible advice that aligns with long-term infrastructure goals. It's about thoughtful planning, economic efficiency, and community safety.

Why Choose LGA BridgeSupport?

Expertise: Our team is led by a seasoned professionals with almost 30 years of specialized experience, bringing deep insights into the specific challenges faced by Victorian local government authorities.

Tailored Solutions: We customize our services to align closely with the unique requirements of each council, ensuring relevance and impact.

Cost-Effective Strategies: Our focused approach allows us to deliver superior services at a competitive price point, without the overheads associated with larger consulting firms.

Local Focus: We are dedicated to serving Victorian communities, ensuring that our solutions are not only effective but also culturally and geographically appropriate.

Community and Safety

At LGA BridgeSupport, we are dedicated to projects that not only comply with regulatory standards but also contribute positively to the welfare and safety of the community.

Our aim is to assist local government authorities in managing their bridge assets more effectively, ensuring these structures are safe, functional, and prepared to meet future demands.
